1. Organisation Overview

1.1 Name

Glamour Girl Hair

1.2 Brief History

Glamour Girl Hair is a small business which was founded in 2022 that sells Vietnamese straight super double drawn bundles. Vietnamese hair is one of the most wanted types of human hair. The texture of the hair of the hair is naturally straight, thick, smooth, black/brown, it does not tangle or shed easily and never chemically treated. It can last a minimum of 2 years and maximum of 3 years if taken diligent care of.

1.3 Mission and Vision

The vision and mission are to expand globally and be the most trusted and glamorous hair brand that empowers women to express their beauty, confidence, and individuality through premium quality hair

1.4 Target Audience

Women who want to look expensive on a budget and loves wigs and bundles

2. Website Goals and Objectives

2.1 Specific Goals

- To show textures, lengths, colours, and how it looks installed
- To show price, stock
- Reviews with pictures

2.2 Key Performance Indicators (KPIs)

- Conversion Rate
- Average Order Value
- Product Page Views

3. Current Website Analysis

Currently Glamour Girl Hair does not have a website, but you can find the business on WhatsApp

3.1 Strengths

Glamour Girl Hair operates in a high-demand beauty market with strong brand positioning. Its key strengths include a memorable brand name that conveys luxury, a product that is visually marketable on social media, and multiple revenue streams through product sales and services. The business benefits from a repeat-customer model and strong reliance on word-of-mouth and social proof, which are critical in the South African hair industry. The flexibility to sell both online and in-person gives the brand room to scale with low operational complexity.

3.2 Weaknesses

High competition

Price wars

3.3 Opportunities for Improvement

Focus on value, not just price. Show bundles, care guides, and before/after gallery to justify premium pricing. Do not compete on Rands only.

4. Proposed Website Features and Functionality

- Big, high-quality image/video of a model wearing Glamour Girl Hair bundles. Show texture, length, and "glam" vibe.
- Headline: Glamour Girl Hair - Luxury Hair, Unmatched Confidence

- Subhead-line: Premium Human Hair Wigs, Bundles & Professional Installs in South Africa
 - Shop Now button goes to Products page
 - Floating WhatsApp Us button for quick DMs
-
- Who started Glamour Girl Hair and why
 - Mission.
 - What makes us different
 - Photo
 - Social proof

5. Design and User Experience

5.1 Colour Scheme

Hex: #0A0A0A

Black = glamour, sophistication, and premium. It is the base colour of most hair products. Using black for headers, navigation, and text makes the brand feel high-end and bold. Also great for a "luxury salon" vibe and makes hair textures stand out in photos.

Hex: #6B4226

Brown connects directly to hair, warmth, and natural beauty. It feels earthy and trustworthy. This is perfect for buttons, accents, and backgrounds. It softens the black, so the site does not feel too harsh and appeals to the target SA market who buy natural tones.

5.2 Typography

Play-fair Display is a high-contrast serif font. It feels elegant, luxury which matches the "Glamour" in your brand name. It works great for big headlines like Luxury Hair, Unmatched Confidence, and product titles. The curves feel feminine, but the bold weight keeps it strong and premium against the black background.

5.3 Layout and Design Approach

The overall look and feel for Glamour Girl Hair are luxurious, confident, and modern.

5.4 User Experience Considerations

this helps visitors quickly browse, trust the brand, and complete the main goal to buy hair or book a service.

5.5 Sitemap

[Insert your sitemap diagram below (We will look at this part later so you can skip it or do it yourself by researching and consulting the lecture to assist you in creating it).]

[Insert Sitemap Diagram Here]

5.6 Low-Fidelity Wireframes

[Insert low-fidelity wireframes for your pages below — boxes and labels only, no colours or final content (We will look at this part later so you can skip it or do it yourself by researching and consulting the lecture to assist you in creating it)

[Insert Wireframes Here]

6. Technical Requirements

6.1 Hosting and Domain

glamourgirlhair.co.za
glamourgirlhairshop.com

6.2 Languages and Frameworks

The site will use HTML5, CSS3, and JavaScript for the front-end design and interactivity. For the back-end and store functionality, it will use WordPress with WooCommerce running on PHP and MySQL. This tech stack is chosen because it's cost-effective, easy to manage for a small business, and has built-in e-commerce tools needed to sell hair and take bookings.

7. Timeline and Milestones

[Fill in target dates that follow your module's submission schedule. You can add additional milestones of your choice as these are examples]

Milestone	Target
<i>Organisation and proposal approved</i>	<i>[date e.g. 05/08/2026 or Week 3]</i>
<i>Content research and sourcing complete</i>	<i>[date]</i>
<i>Sitemap and folder structure finalised</i>	<i>[date]</i>
<i>HTML pages built and content integrated</i>	<i>[date]</i>
<i>Navigation linked and cross-browser tested</i>	<i>[date]</i>
<i>GitHub repository finalised, Part 1 submitted</i>	<i>[e.g. 14/08/2026 or Week 4]</i>

8. Budget

<i>Domain registration</i>	R150 per year
<i>Hosting (annual)</i>	R1,788 per year
<i>Development</i>	R0-R8000
<i>Ongoing maintenance</i>	R200-R500
<i>[additional item, if relevant]</i>	R0-R300
